

Boston University, Department of Archaeology

Program Information

Program Name	Boston University, Department of Archaeology
General Description / Special Programs	Archaeology is the study of the human past from prehistory to recent times, primarily through the study of the material remains of past societies. By its nature, archaeology is an interdisciplinary study and archaeologists explore the past from a variety of perspectives, drawing upon a wide array of disciplines from classics to anthropology, art history, history, and the physical sciences, to advance the study of past cultures around the world. This interdisciplinary perspective, together with distinctive archaeological methods and theories, enriches our teaching and research in the classroom, the laboratory, and the field.
Established	
Country	United States
State	MA
City	Boston
Address Line 1	675 Commonwealth Avenue
Address Line 2	Suite 347
Address Line 3	
Zip	
Fax	(617) 353-6800
